

Solar LED Lighting

Solar Light Whiz provides your home with light that offers the imitated feel of a traditional skylight, without the intrusive installation or the structural drawbacks! Solar Light Whiz offers flexible installation & modular design, allowing you to tailor a lighting solution suited to your needs.

How do the lights look?

Commercial Lighting

If you have a commercial property and you're looking to impress your clientele or keep the store well-lit, we can help you out!

Recessed Lighting

Need a feature light, but don't want to go through the expensive hassle of installing a skylight? We've got your back.

How It Works

1 Solar LED Panel

Our LED lights use simple [SPRINGCLIPS] to fasten them into place.

2

3

Benefits

Flexible installation options

Multiple lights can be powered by a single PV panel. Installation is hassle free, and DIY-friendly.

Imitation lighting for any room

With our wide range of leads & splitters, we can illuminate almost any room throughout your home.

Accessories available

Night ops kit for night-time operation.
Single, or multi-channel dimmers.
Ventilated LED fixtures.

Adjustable Solar Panel

Our panels are able to be tilted to a number of different angles, ensuring maximum sunlight exposure throughout the day!

Minimal Roof Penetration

Unlike a skylight, Solar Light Whiz only requires space to pull power leads through your roof—barely a 1cm of roof penetration!

Ceiling Mounted Lights

Our lights clip to your ceiling, and only require a small cut-out so that their frame may fit!

Product Range

Round LED Lights

Solar Light Whiz provides a wide range of circular LED downlights, ideal for bathrooms and stairwells—or wherever you need bright, focussed light!

Model	Watts	Size	Lumens
